

Tip Can be combined with Buckaroo PayPerEmail and Buckaroo's Credit Management solution.

Introduction

Google Pay is a fast, easy, and secure way to pay online. It is available for e-commerce payments in most European countries. Google Pay uses a digital wallet that allows users to link one or more debit and/or credit cards.

Google Pay works on most modern Android smartphones and Wear OS smartwatches with NFC and can also be used online via web browsers.

Customers can pay directly via the GPay button on the product page or select Google Pay later during checkout.

Online payments are highly secure thanks to tokenisation, strong customer authentication, end-to-end encryption, and additional security measures from Google.

Currency: EUR

Google Pay payment process

for the payer

Select Google Pay in checkout or via GPay button on a product page

To your Google Account

The payer is redirected to Google Pay, selects an available card or payment method and, optionally, a shipping address, and then clicks continue.

Approve

The payer sees an order summary and clicks the button to confirm the order or payment

Webshop

The payer is redirected to the confirmation page and is then returned to the webshop

Benefits Google Pay (via Buckaroo)

- Available in most European countries
- Reduced risk of errors thanks to pre-filled payment details.
- A faster checkout thanks to the ability to pay directly from the product page or from the shopping cart
- Secure payment thanks to multiple layers of security
- Direct payment method
- Contract and payout via Buckaroo

Integration

Google Pay is available through the Buckaroo Checkout, the Buckaroo API, and in the plugins/apps supported by Buckaroo.
